To: AVEK Water Agency Urban Water Retail Customers
Re: Wholesaler Supply Information - May 2016 Emergency Regulations

The Antelope Valley-East Kern Water Agency (AVEK), in complying with the May 2016 Emergency Regulations of the State Water Resources Control Board (Water Board), has approved the attached table for distribution to our urban water retail customers and for posting on the Agency's website.

AVEK, as an urban water wholesalers, is to provide information on the volume of water they expect to deliver to each urban water supplier in each of the next three years using the assumptions in the Water Board's May regulation. The provided table entitled: *Future 3-Yr Drought Water Supply/Demand Projections* includes the projected supply vs. demand calculations for the Agency for water years 2017 through 2019. Also provided is a list of AVEK customers and their corresponding supply projections, assuming:

- Same hydrologic conditions of water year 2013 occur in water year 2017,
- Same hydrologic conditions of water year 2014 occur in water year 2018,
- Same hydrologic conditions of water year 2015 occur in water year 2019, and
- No temporary change orders that increase the availability of water to any urban water supplier are issued in the next three years.

For further information, please visit the below websites:

- May 2016 Emergency Regulation and supporting documents (including the online form that urban water retailers will use, when available):
http://www.waterboards.ca.gov/water_issues/programs/conservation_portal/emergency_regulation.shtml
- Frequently Asked Questions:
http://www.waterboards.ca.gov/water_issues/programs/conservation_portal/faq.shtml

If you have any further questions, feel free to contact our office at: 661-943-3201.

Sincerely,

Tom Barnes
Resources Manager
